DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Applicant must choose a single species from group I and group II.

Group I:

- Species A: claim 48.
- Species B: claim 50.

Group II:

- Species D: claims 19 and 32.
- Species E: claims 20 and 33.
- Species F: claims 21 and 34.
- Species G: claims 22 and 35.

It is noted that claims 19-22 depend off of claim 48/Species A and claims 32-35 depend off of claim 50/Species B, so the election from group II will depend of the election from group I as to which claims are examined. For example, if Species A and D are elected, claims 48 and 19 will be examined while claim 32 will be withdrawn due to its dependency off of non-elected Species B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 47 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
